SUMMARY

Enthusiastic and self-taught Front-End Developer with a strong foundation in React.js, JavaScript, HTML, and CSS. Proven ability to create responsive and user-friendly web applications through various personal and collaborative projects. Eager to leverage my skills and passion for web development in a professional environment.

SKILLS

Languages & Tools: HTML5, CSS3, SASS, JavaScript, Bootstrap, Regular Expression, TypeScript, RxJS, React, PHP, ASP.NET (basic), MySQL, SQL Server (basic)

Front-End Frameworks: React.js, Redux Toolkit, Tailwind CSS, Bootstrap

Back-End Knowledge: Basic understanding of ASP.NET, MySQL, Firebase

EXPERIENCE

Front-End Developer - Leves, Fuzik
Worked on building and maintaining responsive web pages using React.js and Bootstrap, and collaborated with team members on various front-end tasks.

Developed interactive user interfaces and learned the fundamentals of back-end integration using ASP.NET and MySQL.

CERTIFICATIONS

- JavaScript - Jonas Schmedtmann (Udemy)
- Next.js - Jonas Schmedtmann (Udemy)
- Front-End Development - Route Academy
- Front-End Development - Tarmeez Academy

PROJECTS

1- E-Commerce Malimart : [Live Demo](#) : [github](#)

- Description: A mock e-commerce product page showcasing dynamic product display and user interactions.
- Technologies: Vite, React, Bootstrap, Firebase Firestore, Redux Toolkit
- Role: Created product display and cart functionality, implemented responsive design, and ensured a smooth user experience.

2- Order & Food Delivery : [Live Demo](#) : [github](#)

- Description: A food delivery product page with dynamic product display and user interactions.
- Technologies: React, Tailwind CSS, Redux Toolkit, React Router
- Role: Developed product display and cart functionality, ensured responsive design and seamless user experience.

3-Pizza Ordering (Next.js) : [Live Demo](#) : [github](#)

- Description: A web application for ordering pizzas online.
- Technologies: Next.js, React, JavaScript, Tailwind CSS
- Role: Built front-end functionality with Next.js for server-side rendering and React for dynamic user interactions.

4-Notes Application : [Live Demo](#)

- Description: A web application for managing notes using React.js with local storage.
- Technologies: React.js, JavaScript, Tailwind CS

EDUCATION

- Bachelor of Arts in Archaeology - Menoufia University
- Post-Graduation Diploma in Front-End React Development
